

Refrigerant Recovery Certification

January 21

April 27

(Please circle desired date)

Participants will be tested for successful completion of a core section (required for all certification types) on environmental impact of CFCs and HCFCs, the Clean Air Act and EPA regulations. Participants can be certified in the following types:

Type I - Small Appliance

Type II - High Pressure and Very High Pressure

Type III - Low Pressure

Universal - Type I, Type II

and Type III

PROGRAM FEES

The fee for the certification program is \$150 per person. This includes course study manual, testing materials and lunch.

(Retests will be \$87.50 if training manual is brought back, \$107.50 if new manual is required.)

Checks should be made payable to:

ALABAMA POWER and mailed to:

HVAC Training Center

2388 County Road 93

Verbena, Alabama 36091

Study manuals will be mailed to
participants when payment is
received.

REFRIGERANT TRANSITION AND RECOVERY CERTIFICATION TRAINING

The course involves five hours of classroom study with study manuals, followed by a proctored test period of up to two hours. The program is open to all HVAC contractors, schools, city government agencies, appliance service groups, and any other group needing certification.
