**Issue Statement**

**WE1 & CE1 Point & Non-Point Source Pollution** – Effects of the various sources of pollution (e.g., both point, non-point, trash, etc.) that originate within the Warrior and Coosa Basins on the water quality of the lakes and rivers of the project study area.

\* The US Department of Interior including the US Fish and Wildlife Service has suspended electronic communication and it is not known when service will be restored. Communication with USFWS must be conducted via mail, fax and or telephone.

### **IAG Tasks and Responsibilities**

The following are the responsibilities for this IAG:

- Create a comprehensive list of known point and non-point source pollution sites originating within the project boundaries of the Warrior and Coosa Basins.
- Identify Federal and State laws and standards regulating levels of point and non-point source pollution as well as “Best Management Practices”.
- Review, identify and discuss methods available to APC to improve, control and reduce point and non-point source pollution sites adversely affecting the Warrior and Coosa project lakes and rivers.
- Make recommendations to the WCRT & EcoRAT on ways to reduce negative impacts of point and non-point source pollution within project boundaries.

### **Work Scope and Product**

- Task 1 Finalize IAG membership and work plan.
- Task 2 Create a comprehensive list of known point and non-point source pollution sites originating within the project boundaries of the Warrior and Coosa Basins.
- Task 3 Identify Federal and State laws and standards regulating levels of point and non-point source pollution.
- Task 4 Coordinate efforts between this IAG and the Clean Water Partnership Program
- Task 5 Define the magnitude and prioritize for action the point and non-point source pollution sites identified in Task 2.
- Task 6 Review, identify and discuss methods available to APC to improve, control, and/or reduce point and non-point source pollution sites defined in Task 2 that adversely affect the Warrior and Coosa project lakes and rivers.
- Task 7 Make recommendations to the WCRT and the EcoRAT on ways to reduce negative impacts of point and non-point source pollution within project boundaries.

### **Schedule**

The E1-IAG will begin work with a kick-off meeting on January 30<sup>th</sup>, 2002 and will continue meeting periodically until completion of the above Tasks. The following is a “projected” schedule, which will either be implemented with “face-to-face”, or “conference call” meetings.

- Meeting 1 “Kick-off” meeting; introduce IAG members, complete Task 1 and begin discussing Task 2.
- Meeting 2 Finish Task 2, and begin Task 3.
- Meeting 3 Finalize Task 3 and begin Task 4.
- Meeting 4 Complete Task 4 and start on Task 5.
- Meeting 5 Finish Task 5 and complete Task 6.
