

Warrior River Project

Chairperson: Barry Lovett APC BKLOVETT@southernco.com (205) 257-1268
 Facilitator: Bruce DiGennaro Kleinschmidt Bruce.DiGennaro@KleinschmidtUSA.com (860) 526-2358

Members:

<u>Name</u>	<u>Organization</u>	<u>E-mail</u>	<u>Work Phone</u>
Jim Beason	Smith Lake Civic Association	jimdot5@netzero.net	(205) 387-2654
Deb Berry	Smith Lake Environmental Preservation Committee	debcberry@aol.com	(205) 823-0015
Bill Campbell	EPRO	wcampbell@eproconsulting.com	(207) 621-7082
Ray Cline	Federation of Fly Fishers	doraycline@msn.com	(256) 880-6635
Bill Dykes	APC	WCDYKES@southernco.com	(205) 257-3585
John Eisenbarth	Trout Unlimited	lflyfish@bellsouth.net	(256) 287-0050
Keith Floyd	ADCNR	kbfloyd@hiwaay.net	(256) 353-2634
Charlotte Hamilton	Alabama Water Watch	dchamilton@mindspring.com	(205) 674-1150
Bruce Hamrick	Walker County Commission	wcadm@sonet.net	(205) 384-7230
Jim Howard	Alabama B.A.S.S. Federation	alcondir@aol.com	(334) 616-7192
Bob Huffaker	Alabama Marine Police	bhuffaker@dcnr.state.al.us	(334) 242-3673
Joe Nicholson	USFS	jnicholson@fs.fed.us	(334) 241-8128
Bob Pasquill	USFS	bpasquill@fs.fed.us	(334) 241-8158
Walter Ramey	APC	WRRAMEY@southernco.com	(205) 257-4593
Stephanie White	APC	SKWHITE@southernco.com	(205) 257-1635

Issue Statements

WR1 Recreation Management (Access, Facilities, and Use) - Ability of project lands and waters (including existing recreation facilities and access) to accommodate current and future recreation demand while protecting public safety and the environment.

WR3 Lake Level Fluctuations - Effects of project operations and lake level fluctuations on lake oriented and tailwater recreation access and use.

WR4 Downstream Flows – Impact of downstream releases on tailwater and lake oriented recreation opportunities.

WR5 Flood Control – Impact of potential operational changes for recreation or other resource protection on downstream flood protection and the potential impact of flood control measures on recreation.

IAG Tasks and Responsibilities

This IAG is charged with:

- Utilizing and modifying the process developed by the Mitchell CR1 IAG for evaluating and addressing recreation management and access issues specific to the Smith development, including developing a vision statement for Smith

Warrior River Project

- Identifying specific areas where lake level fluctuations may be adversely affecting recreation at the lake, including the nature and timing of the affect (e.g., access to sections of water, access to facilities and aesthetics).
- Working with the APC Project Operations Group to identify “reasonable” (based on hydrologic, structural, and other limitations identified) changes and alternatives for modifying project operations, including flood control constraints and operations that would benefit recreation
- Identifying any studies, if applicable, that need to be performed for identifying and/or evaluating changes to Project operations
- Presenting a range of reasonable alternatives or recommendations to the WCRT regarding modifications to facilities or current Project operations and provide recommendations for recreation access, facilities, and use.

Work Scope & Product

- Task 1 - Utilize the stepwise process diagram and solution principles to guide the planning process for addressing recreation management issues at the Smith development.
- Task 2 - Develop a Vision Statement for the Smith development.
- Task 3 – Review the operational constraints and current operations of the Smith development (see Initial Information Packages IIPs).
- Task 4 - Answer the list of standard questions for WR1, WR3, WR4 & WR5 in order to characterize the existing and potential future condition and lake level fluctuations – from a recreation setting perspective.
- Task 5 – Review stakeholder requests (e.g., agency letters) for particular studies and/or enhancement measures to ensure that these are incorporated into study planning, if applicable
- Task 6 - Develop and recommend operation scenarios to the Project Operations Group for analysis. These scenarios should reflect initial thinking on potential solutions and be designed to narrow the focus of Task 10 below. Analysis by the Project Operations Group will focus on an assessment of potential impacts associated with any suggested changes to operations.
- Task 7 - Discuss results of the Project Operations Group analyses.
- Task 8 - Report back and make recommendations to the WCRT regarding Tasks 1 through 7.
- Task 9 - Meet with the E8 and E10 group to discuss potential studies.
- Task 10 – Develop study designs/methods/plans and review agreed upon studies, literature reviews, etc.
- Task 11 - Check the solution principles to ensure proposed study plans are consistent.
- Task 12 – Provide recommendations for Project operations (lake and flood) and recreation access, facilities, and use that address the Smith development to the WCRT to be considered in conjunction with all ecological and recreational issues.

Schedule

The WR1, 3, 4 & 5 – IAG is anticipated to begin work with a kick-off conference call on October 10, 2001. The Group will meet via conference call and face-to-face as necessary. The work products listed above should be completed by mid-2002 in order to take advantage of any field work that is determined to be needed to address the tasks above.
