

FEDERAL ENERGY REGULATORY COMMISSION  
WASHINGTON, DC 20426  
July 9, 2009

OFFICE OF ENERGY PROJECTS

Project No. 349-150-Alabama  
Martin Dam Hydroelectric Project  
Alabama Power Company

Mr. Eugene B. Allison, Hydro General Manager  
Alabama Power Company  
600 North 18<sup>th</sup> Street  
P.O. Box 2641  
Birmingham, AL 35291

**Reference: Acceptance of Revised Study Plan 2 for the Martin Dam Hydroelectric Project**

Dear Mr. Allison:

On July 1, 2009, you filed with the Commission a revised Study Plan 2 (*Assessment of the Influence of Shoreline Modifications on Aquatic and Semi-Aquatic Species' Use of Various Shoreline Types for the Martin Dam Hydroelectric Project*) incorporating several minor modifications we had requested in our Study Plan Determination letter of April 17, 2009. The revised Study Plan 2 you filed on July 1, 2009 is acceptable, provided the first sentence of section 8.0, *Products*, is modified to state that annual reports will be submitted on July 1, 2009 and 2010 for the aquatic species and on November 1, 2009 for semi-aquatic species.

The revised reporting schedule provides adequate time to include the results of the studies on semi-aquatic species that ends on September 15, 2009, into the annual report.

If you have any questions, please contact Lee Emery at (202) 502-8379.

Sincerely,

Mark Pawlowski, Chief  
Hydro East Branch 2
