Subject: Draft Shoreline Management Plan Reminder

Joe,

Viki forwarded your note regarding comments on the draft SMP.

We are at a fairly early stage in the drafting process and thus I would like to get any and all ideas out on the table. We have not gotten too deep into how the permitting process might be modified/enhanced, but It would be good to know if there are specific areas we should be thinking about/looking at (as you suggest in your email).

Please send along any thoughts you have. We can then work them into future meetings/discussions.

Thanks,

Bruce

Viki,

We were advised to defer comment on new proposals during the last meeting until the next meeting. Several new issues were proposed:

- * Mitigation by the Permittee
- * Public review of permits for bulkheads, etc.
- * Permitting Program Notification of all agencies/general public/adjacent property owners, etc.
- * Permit Cost by Permittee

If this is not the time for these items, I will defer until our next meeting.

Joe Addison
