

Warrior Cooperative Relicensing Team (WCRT)
Recreation/Land Use Issue Statements

- WR1 Recreation Management (Access, Facilities, and Use)** - Ability of project lands and waters (including existing recreation facilities and access) to accommodate current and future recreation demand while protecting public safety and the environment.
- WR2 Public Safety** - Effect of project facilities, operations, and/or uses on public safety.
- WR3 Lake Level Fluctuations** - Effects of project operations and lake level fluctuations on lake oriented and tailwater recreation access and use.
- WR4 Downstream Flows** – Impact of downstream releases on tailwater and lake oriented recreation opportunities.
- WR5 Flood Control** – Impact of potential operational changes for recreation or other resource protection on downstream flood protection and the potential impact of flood control measures on recreation.
- WR6 Shoreline Development** – Management and enforcement of shoreline development to protect public safety, access, aesthetics, terrestrial and aquatic habitats, and other resource values.
- WR7 Cultural Resources** – Potential impact of the project and/or project operations on cultural resources, including historic and prehistoric properties.
- WR8 Public Education** – Identify existing and potential opportunities that promote increased public education regarding the project, recreation opportunities, public safety, and conservation of natural resources, including interpretive opportunities.
- WR9 Federal Lands & Waters** – Potential impact of the project on federal lands including, but not limited to designations, such as Wilderness Areas and Wild and Scenic Rivers.
