

RATE SG STANDBY GENERATOR CAPACITY

By order of the Alabama Public Service Commission dated May 6, 1996 in Docket #U-3445.

PAGE 1 of 2	EFFECTIVE DATE April, 1996 Billings	REVISION Second
----------------	--	--------------------

AVAILABILITY

Available in all areas served from the interconnected system of the Company.

APPLICABILITY

Applicable for any Consumer with engine powered generators having a rated capacity of 250 KW or more that can be operated in parallel with the Company's power generation and distribution system. The Company shall be the primary operator of the generators for the purpose of this program.

MONTHLY RATE (SECONDARY)

Customer Charge:	\$620.00 per customer
Capacity Credit:	\$2.31 per KW

OPERATING PERIOD

The Company shall initiate and terminate the Operating Period. The Operating Period will extend up to eight (8) hours per day, five (5) days per week, two hundred-forty (240) hours per year. The Consumer will be required to maintain a sufficient fuel supply to operate its generator(s) under the above conditions. The Consumer will receive a capacity credit to its monthly bill based upon the contracted KW output of the generator(s).

MAINTENANCE AND TESTING OF EQUIPMENT

The Company reserves the right to test the operation of the Consumer's generator(s) at any time during the year other than the maintenance periods described herein or other periods agreed to by the Company. Periodic testing will be used to verify the availability and the capacity of the generator(s). Annual or other scheduled maintenance of the Consumer's generator(s) should be performed by the Consumer during the calendar months of April and November. Other maintenance may be performed by the Consumer at other times upon approval by the Company and with a minimum notice of twenty-four (24) hours. Emergency maintenance may be performed as needed.

RATE SG STANDBY GENERATOR CAPACITY

By order of the Alabama Public Service Commission dated May 6, 1996 in Docket #U-3445.

-----------------------	---	---------------------------

METERING AND CONTROL EQUIPMENT

The metering and control equipment will be furnished, owned, and installed by the Company.

ADJUSTMENT FOR PARALLEL GEAR INSTALLATION

The monthly customer charge shall be reduced by eight dollars (\$8) per thousand dollars (\$1,000) of the Company's avoided capital investment whenever the Consumer furnishes and installs the parallel gear. This same customer charge will apply if the Consumer chooses not to install the parallel gear, but instead elects to utilize its own open transition transfer switch for purposes of engaging its standby generator capacity. In no event will the customer charge reduction exceed five hundred dollars (\$500).

TERM OF THE CONTRACT

Service under this rate shall be for a minimum period of five (5) years. Either party may terminate this contract by providing two (2) years' written notice to the other party of its intention to do so; provided, however, that the Consumer may not terminate this contract prior to five (5) years after the initial contract date.

UNAVAILABILITY DURING OPERATING PERIOD

If the Consumer's standby generator capacity is unavailable during a designated Operating Period, the capacity credit will be suspended at least for a three (3) month period. The capacity credit will not be re-instated until the Consumer has demonstrated that it can actually supply the contracted capacity upon demand.

GENERAL

Service under this rate is subject to rules and regulations approved or prescribed by the Alabama Public Service Commission, including any Special Rules and Regulations governing the application of this rate.
