EFFECTIVE DATE  
June, 2016 Billings

REVISION  
Fourth

## AVAILABILITY

Available in all areas served from the interconnected system of the Company.

## APPLICABILITY

Applicable for any Customer with engine powered generators having a rated capacity of 250 KW or more that can be operated in parallel with the Company's power generation and distribution system and in accordance with all applicable emission requirements. The Company shall be the primary operator of the generator(s) for the purpose of this program.

## MONTHLY RATE (SECONDARY)

The Customer will receive a capacity credit to its monthly bill based upon the contracted KW output of the generator.

### Base Charge:

\$170.00 per customer

### Payment for Capacity:

#### NON-EMERGENCY GENERATORS

Capacity Credit: \$2.55 per KW

## OPERATING PERIOD

The Company shall initiate and terminate the Operating Period. The Operating Periods will not extend beyond the time periods defined below:

NON-EMERGENCY GENERATORS: Eight (8) hours per day, five (5) days per week, two hundred (200) hours per year, not including any hours for maintenance and testing

The Customer will be required to maintain a sufficient fuel supply to operate its generator(s) under the above conditions.

## MAINTENANCE AND TESTING OF EQUIPMENT

The Company reserves the right to test the operation of the Customer's generator(s) at any time during the year other than the maintenance periods described herein or other periods agreed to by the Company. Periodic testing will be used to verify the availability and the capacity of the generator(s). Annual or other scheduled maintenance of the Customer's generator(s) should be performed by the Customer during the calendar months of April and November. Other maintenance may be performed by the Customer at other times upon approval by the Company and with a minimum notice of twenty-four (24) hours. Emergency maintenance may be performed as needed.

## METERING AND CONTROL EQUIPMENT

The metering and control equipment will be furnished, owned, and installed by the Company.

## TERM OF THE CONTRACT

Service under this rate shall be for a minimum period of five (5) years.. After such term (as applicable), service hereunder shall continue until terminated by a minimum of two (2) years' written notice by either party to the other stating their intention to do so.

## UNAVAILABILITY DURING OPERATING PERIOD

If the Customer's standby generator capacity is unavailable during a designated Operating Period, the capacity credit will be suspended at least for a three (3) month period. The capacity credit will not be re-instated until the Customer has demonstrated that it can actually supply the contracted capacity upon demand.

## TERMS AND CONDITIONS

1. In taking service under this Rate, Customer agrees to limit the operation of its generator(s) to utilization during the Operating Period and periods of maintenance and testing.
2. Service under this Rate does not affect the ability of Customer to operate its generator(s) in an emergency situation.
